# PRATHAMESH BHIRUD

**PRINCIPAL ENGINEER / TECH LEAD**

---

## PROFESSIONAL SUMMARY

**Principal Engineer / Tech Lead with 14.5+ years of experience** leading full-stack development across **financial services and product platforms**. Deep expertise in **.NET Core/.NET 8, C#, Angular, Azure, microservices, and distributed systems**, with hands-on ownership of **architecture, system modernization, and performance engineering**. Proven ability to **lead large engineering teams**, improve system reliability, and reduce operational costs through **event-driven design, CI/CD pipelines, and cloud automation**. Strong collaborator with Product Owners, Architects, and senior leadership to translate business requirements into **scalable, secure, and maintainable solutions**.

---

## CORE SKILLS

**Programming & Backend:** C#, .NET 8, .NET Core, ASP.NET, Web API, WCF, Python
**Frontend:** Angular (5–15), MVC, HTML, CSS
**Cloud & DevOps:** Microsoft Azure, AWS, Azure DevOps, Jenkins, TeamCity, Octopus, Docker, CI/CD
**Databases:** SQL Server, Oracle, PostgreSQL, MongoDB
**Architecture:** Microservices, CQRS, Event-Driven Architecture, gRPC, Feature Flags, TDD
**Monitoring & Quality:** Splunk, Grafana, Prometheus, ELK, SonarQube
**Tools:** GitHub, Bitbucket, TFS, JIRA, ServiceNow, Visual Studio, VS Code
**AI Tools:** GitHub Copilot, OpenAI APIs, RAG, Azure OpenAI, Azure AI

---

## PROFESSIONAL EXPERIENCE

### GLOBALLOGIC | Consultant – Principal Developer

**May 2023 – Present**

- Full Stack Lead for Special Programs Management (SPM), a large-scale special education case management platform.
- Led and mentored a 30-member engineering team while contributing hands-on across backend and frontend development.
- Collaborated with Solution Architects and Product Owners on system architecture, sprint planning, feasibility analysis, and delivery strategy.

- Designed scalable .NET 8 and .NET Core Web APIs and Angular 15 applications.
- Implemented event-driven architecture using webhooks to improve scalability and system responsiveness.
- Built a real-time PDF translation utility, reducing third-party translation costs by approximately 68%.
- Developed dynamic reporting using DevExpress, reducing report generation time by approximately 55%.
- Implemented SQL validation utilities to prevent compile-time errors during CI check-ins.
- Enforced coding standards using SonarQube, linters, and style guides to improve code quality.
- Integrated CI/CD pipelines using Azure DevOps and TeamCity; automated regression and performance testing.
- Championed GitHub Copilot adoption to improve developer productivity.

**Achievement:** Spot Award – January 2024

---

## MORGAN STANLEY | Senior Manager – Tech Lead

**March 2021 – May 2023**

- Led full stack development for Advisory Supervision Services supporting wealth management and financial advisors.
- Designed and developed microservices using .NET Core and CQRS architecture.
- Implemented inter-service communication using gRPC to improve performance and data consistency.
- Modernized legacy applications by upgrading Angular versions.
- Built Docker-based deployments for private cloud environments.
- Implemented feature flags to support dark launches and zero-downtime deployments.
- Developed monitoring dashboards using Grafana, Prometheus, and Splunk to reduce incident response time.
- Led POCs focused on performance optimization, scalability, and cost reduction.
- Conducted performance reviews and managed delivery commitments.

---

## WILLIS TOWERS WATSON | Senior Analyst – Full Stack Developer

**February 2019 – March 2021**

- Developed risk analytics platforms integrating Angular web applications with Power BI dashboards.

- Implemented Power BI report embedding without individual user subscriptions.
- Built Web APIs to trigger MATLAB-based analytical models.
- Designed and implemented ServiceNow incident automation using REST APIs.
- Analyzed data using SQL to generate risk reports and business insights.

**Achievement:** Best Team Award – Q4 2019

---

## CAPGEMINI | Senior Consultant – Team Lead

**January 2018 – February 2019**

- Led frontend development using Angular 5 for enterprise web applications.
- Designed reusable UI components to improve development efficiency.
- Developed C# Web APIs supporting offline-first and cross-platform solutions.
- Guided and mentored frontend engineers.

---

## ACCENTURE | Senior Analyst – Developer

**April 2015 – January 2018**

- Developed RESTful APIs using C# and Web API for enterprise applications.
- Collaborated with leadership during sprint planning and delivery.
- Implemented Elasticsearch-based search functionality.

**Achievement:** GEMS – Inspire Award (FY 2015–16)

---

## TECH MAHINDRA | Senior Software Engineer

**June 2011 – April 2015**

- Developed enterprise web applications using C#, ASP.NET, and WCF.
- Built and consumed SOAP and REST services.
- Implemented Oracle PL/SQL stored procedures and reports.

**Achievement:** RISE Team Award – Q4 FY 2013–14

---

# CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102)
- GitHub Foundations (GH-900)
- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure Data Fundamentals (DP-900)

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- MongoDB SI Architect Certification
- MongoDB SI Associate Certification

---

## EDUCATION

MBA (Executive) – Business Analytics, Great Lakes Institute of Management, Chennai, 2019
B.E. – Computer Engineering, University of Mumbai, 2011
